

# geoflex

## Flexible, acrylic based waterproofing liquid

*Geoflex is a waterproof coating, which affords excellent protection from rainwater and dampness; has a high resistance to ultra violet light and has a long life expectancy.*

### Uses

Geoflex is a flexible, acrylic based waterproofing liquid used essentially on walls and parapets and is suitable for most surfaces, including: brick, plaster, asbestos [fibre cement], concrete and steel.

Used for the external painting of:

- Plastered walls
- Parapet walls
- Concrete beams
- Fascia boards
- Plastered ceilings
- Steel beams

### Application

Surface preparation is of paramount importance to the success and life expectancy of the system. Ensure that the surface is dry and structurally sound, free of loose, dusting or flaking particles and free from contaminants such as grease and fungus. Mortar and crack defects are to be repaired. Must be used with Acrylic Primer and can be used with a fibremesh or polyprop tissue carrier which acts as reinforcing membrane.

### Properties

Properties	Details
Colour	White
Coverage	Approximately 3 - 5 m <sup>2</sup> per litre (per coat)

### Packaging

Geoflex is available in tins of 5ℓ and 25ℓ.

Manufactured in SA, for SA conditions

Version 001-201307
